

Outer Cape Conservation Commission Directory

This 2009 edition of our directory is provided as part of Safe Harbor's Educational Program to improve communications between applicants and Outer Cape Conservation Commissions. We have included deadlines, submission requirements and contact information for each town on the Outer Cape. Several towns also have wetlands by-laws with additional forms and fees. We recommend contacting Commission offices.

Safe Harbor is available for environmental permitting and coastal habitat restoration. We utilize innovative, low maintenance, low impact and affordable systems for erosion control, storm water management, steep slope stabilization and revegetation. We also offer a wide range of free environmental seminars and publications. More details are available on our website. Thanks to Dakota Shepard for editing this directory. Photo shows Spencer Howard installing 24" sand fencing.
